Name $\qquad$ period $\qquad$

## DO NOW

Observe, record, and describe the role of ecological succession such as in a microhabitat of a garden with weeds.

| Date $\qquad$ <br> Match the vocabulary word with its meaning. |  |
| :---: | :---: |
|  |  |
| 1. Primary Succession | A. The first species to live in an area |
| 2. Secondary Succession | B. An organism that can live on bare rock |
| 3. Climax Community | C. Succession that occurs in an area where no communities already exist |
| 4. Pioneer Species | D. The final community of organisms that results from succession |
| 5. Lichen | E. Succession that takes place in an area where organisms already live |
| Date |  |
| Word | Example |
| Primary Succession |  |
| Secondary Succession |  |
| Climax Community |  |
| Pioneer Species |  |
| Lichen |  |

Date

| Word | NON-Example |
| :--- | :---: |
| Primary Succession |  |
| Secondary Succession |  |
| Climax Community |  |
| Pioneer Species |  |
| Lichen |  |

## Date

After a volcanic eruption has covered an area with lava, which of the following is the MOST likely order of succession in the repopulation of the area?
A lichen $\rightarrow$ grasses $\rightarrow$ shrubs $\rightarrow$ trees
B mosses $\rightarrow$ grasses $\rightarrow$ lichens $\rightarrow$ trees
C grasses $\rightarrow$ trees $\rightarrow$ mosses $\rightarrow$ lichens
D shrubs $\rightarrow$ grasses $\rightarrow$ trees $\rightarrow$ lichens

## Date

$\qquad$
When the Mount St. Helens volcano erupted, the blast covered much of the surrounding area with ash. Based on the diagram above, which list shows the sequence of secondary succession that followed that eruption?
A. $W, Y, X, Z$
B. $\mathrm{Z}, \mathrm{X}, \mathrm{Y}, \mathrm{W}$
X. Z, Y, W, X
D. $\mathrm{X}, \mathrm{Y}, \mathrm{Z}, \mathrm{W}$
