

# Nevada Ecoregion Project

Your group will be in charge of making a resource guide in the form of a power point slide show for a Nevada Ecoregion. The slide show should be between 10-12 slides long and should include the following:

1. A map of the Ecoregion with major cities located and named.
2. Pictures of the landforms of the Ecoregion
3. Abiotic factors typical of the Ecoregion
  - Average rainfall
  - Average temperature
  - Elevations/Altitudes
4. Biotic Factors typical of the Ecoregion
  - At least 4 pictures of common plants with common name
  - At least 4 pictures of common animals with common name
  - A list of and some pictures of endangered plants and animals -labeled
5. Each student in the group is responsible for researching one plant or animal common to the Ecoregion (different than those pictured above). This research should include:
  - the organism's habitat and niche
  - a picture of the organism
  - a food chain in which this organism plays a role
6. Any other information that is unique to this Ecoregion.
